State Total	5,894,121	1,290,485	21.9	6,162,833

Population is drawn from Census 2000 for Washington State. **Total Client Count** is the number of people living in that county who received one or more DSHS services while living there during FY2000. Clients who lived in more than one county were recorded in the last county in which they were served. Client counts rounded to multiples of five. Source: DSHS-RDA FY2000 Client Services Data Base. **Use Rate %** is the percent of the 2000 county population that used DSHS services (clients over population). **Total Expenditure Estimate** by county is based on distributing DSHS program costs for FY2000 by county client counts for that same program. If regional expenditures were available, they were used; if not, state expenditures were used. Expenditures rounded to thousands of dollars. Late in 2002, this estimate will be replaced by a sum of each person's total DSHS service expenditures while in this county.

Washington Counties Ranked by DSHS Service Use - Fiscal Year 2000

This histogram shows counties in order of the percentage of the population using DSHS services. The rank is not an indicator of whether the amount of service provided is adequate to meet the need.
